HCV 1 Probability (Species Diversity) Lampung Province

N

9.44.7 0 9.4 18.8 28.2 37.6

Kilometers

- District Boundaries
- Province Boundaries
- HCV 1 Higher Probability (Forest cover, natural swamp, key spesies range)
- HCV 1 Lower Probability (Forest area with non-forest cover, shrubs, buffer zones and regenerating forest along natural forest edge)
- Birds Range
- River
- Water bodies

Spatial Reference
Name: GCS WGS 1984
GCS: GCS WGS 1984
Datum: WGS 1984
Map Units: Degree
Authority: EPSG
WKID: 4326

Map Description
This HCV 1 Probability Map was developed using multiple key spatial datasets:
– Land cover data from the Ministry of Environment and Forestry (KLHK, 2024)
– RTRW maps outlining official land use planning
– IUCN Red List species distribution maps for key RTE species (e.g. Elephas maximus sumatranus, Panthera tigris sumatrae, Dicerorhinus sumatrensis)
– Bird species occurrence data from BirdLife International's Important Bird Areas (IBA)
– Protected and conservation forest boundaries from national forest zoning datasets
– Tiger conservation landscapes and bird
