HCV 1 Probability (Species Diversity) Pesawaran

N

3 1.5 0 3 6 9 12

Kilometers

- Sub-District boundaries
- Village boundaries
- River
- HCV 1 Higher Probability (forest cover, mangrove cover, key spesies range)
- HCV 1 Lower Probability (Protection forest with non-forest cover, All non-forest natural vegetation (shrubs), buffer zones and regenerating forests along natural forest edges)
- Birds Range

Spatial Reference
Name: GCS WGS 1984
GCS: GCS WGS 1984
Datum: WGS 1984
Map Units: Degree
Authority: EPSG
WKID: 4326

Map Description
This HCV 1 Probability Map was developed using multiple key spatial datasets:
– Land cover data from the Ministry of Environment and Forestry (KLHK, 2024)
– RTRW maps outlining official land use planning
– IUCN Red List species distribution maps for key RTE species (e.g. Elephas maximus sumatranus, Panthera tigris sumatrae, Dicerorhinus sumatrensis)
– Bird species occurrence data from BirdLife International's Important Bird Areas (IBA)
– Protected and conservation forest boundaries from national forest zoning datasets
– Tiger conservation landscapes and bird conservation priority areas
